EXPERIENCE & INTERNSHIPS

Freelancer at Mostaq1

Present

As a freelance developer on Mostaq1, I have maintained a 5-star rating by providing high-quality work and a strong focus on client satisfaction in all my projects.

Trainee, Information Technology Institute (ITI)

Sep 2023

Track: Advanced Front-End Web Development using React JS

(Clientside Technologies – Responsive design – CSS preprocessor – ECMAScript (ES6) – React.js framework)

Trainee, Banque Misr

Jul 2022 - Aug 2022

Trainee, CIB Bank

Jul 2022 - Aug 2022

PROJECTS

Shopnetic - Ecommerce with Next.js, TypeScript, Tailwind, Shadcn Ui, api, [live demo](#) | [Github](#)

- Developed a fully functional e-commerce platform with modern UI and responsive design using Tailwind CSS and Shadcn UI. Implemented complete authentication workflows (sign-up, login, password reset, verification) and core features such as product browsing, brand and category management, reviews, wishlists, and a shopping cart with coupon support. Integrated secure payment options, including cash on delivery and Visa card.

Happy Shop - Ecommerce with React , Bootstrap, Redux, Api, [live demo](#) | [Github](#)

- Built a responsive e-commerce application with React and Bootstrap, utilizing Redux for efficient state management. Included full authentication and role-based authorization for users and admins. Developed structured sections for products, brands, categories, subcategories, reviews, and wishlists. Enabled shopping cart functionality with discount codes and payment support for both cash and card transactions.

Admin Dashboard - React, Material Ui, Charts, [live demo](#) | [Github](#)

- Created a flexible admin dashboard using React and Material UI, featuring dark mode and dynamic chart visualizations. Focused on building reusable, modular components for efficient data presentation and analytics. Designed for responsiveness and optimized usability across devices.

Modawanaty - Next.js, TypeScript, Tailwind, Shadcn Ui, Sanity CMS, [live demo](#) | [Github](#)

- A modern blog platform with a headless CMS backend, offering responsive design, seamless content management, and optimized reading experience.
